

MORETHANONEWAY.ORG - SOCIAL MEDIA CONTENT ROADMAP (REVISED)

First 10 Posts Strategy - Faceless Content That Actually Performs

Created: November 2025

Goal: Build awareness and establish credibility before asking for story submissions

SETUP NOTES

Platform Setup:

- Post consistently: 3-4x per week minimum
- Best posting times: 7-9am, 12-1pm, 7-10pm (when students are scrolling)
- Use CapCut for editing (free, easy for screen recording + text overlays)
- Find trending audio in TikTok's Creative Center or by searching "trending sounds"

Important Strategy Notes:

- Posts 1-9: Build trust and provide value (NO story submission asks)
- Post 10: First soft mention of story sharing
- After Post 10: Rotate content types, create more of what performs well
- Every 5-7 posts after Post 10: Include ONE soft story submission reminder

EFFECTIVE FACELESS FORMATS (in order of performance):

1. **Screen recordings** (showing your site in action) - BEST OPTION
 2. **POV/hands-only** (desk, keyboard, notebook - creates relatability)
 3. **B-roll + text** (campus shots, coffee shop, library with text overlay)
 4. **AVOID:** Static gradients with text (algorithm doesn't like these)
-

POST 1: Hook Them With Relatability

Format: POV - Hands on desk/keyboard with text overlay

What to film:

- Film your hands typing slowly on keyboard (or flipping through a notebook)
- Could be hands resting on desk with laptop visible in frame

- Simple desk setup - coffee cup, notebook, laptop - nothing fancy
- Film 20-30 seconds of this simple action

Hook text (appears first): "POV: It's week 8 and you still don't have it figured out"

Content Structure:

- Text appears over POV footage:
 - "Everyone else seems to have internships lined up"
 - "Your resume still feels empty"
 - "You're questioning everything"
 - Final screen: "You're not alone in this"

Audio: Trending emotional/anxious sound (search "college stress" or "overwhelmed" on TikTok)

Caption: "The 'everyone has it together except me' feeling is so real. But most people are just better at hiding their struggles. ❤️"

Hashtags: #collegestruggles #engineeringstudent #internshipseason

How to film: Prop your phone up looking down at desk, press record, do natural movements with hands/keyboard for 30 seconds. Add text and audio in CapCut.

Notes: NO mention of your site yet. Just pure relatability to start building trust.

POST 2: Show The Problem

Format: Screen recording - scrolling job sites

What to record:

- Open Indeed or LinkedIn on your computer
- Search "entry level software engineering internship" or similar
- Scroll through postings that show ridiculous requirements
- Screen record this scrolling (15-20 seconds)

Hook text: "POV: Looking for 'entry-level' internships"

Content Structure:

- Text appears as you scroll:
 - "Entry level = 3 years experience? ☒
 - "Unpaid but requires expertise? ☒

- "Must know 15 programming languages? "
- Final frame: "There's a better way"

Audio: Frustrated/ironic trending sound (something sarcastic)

Caption: "How is anyone supposed to start when entry-level requires 5 years experience?  (Better search method coming tomorrow)"

Hashtags: #internshipsearch #collegeproblems #engineeringmajor

How to film: Use screen recording on your computer (Mac: Cmd+Shift+5, Windows: Windows+G). Upload to phone, add text and audio in CapCut.

Notes: Tease the solution but don't show it yet. Creates curiosity for next post.

POST 3: Introduce The Solution (Your Site)

Format: Screen recording - showing your site

What to record:

- Open MoreThanOneWay.org
- Click into Internship Finder
- Show a few of the pre-filtered searches
- Show how clean and simple it is
- Total recording: 20-25 seconds

Hook text: "I got tired of impossible requirements, so I built this"

Content Structure:

- Screen record navigating the site
- Text appears:
 - "Pre-filtered internship searches"
 - "No BS requirements"
 - "Just real opportunities for students"
 - "Completely free forever"

Audio: Upbeat/motivational trending sound

Caption: "Spent months building this because I hated watching students give up. Free resource, link in bio if you need it. 

Hashtags: #internshiptips #engineeringstudents #jobsearch

How to film: Screen record on computer, transfer to phone, add text/audio in CapCut.

Notes: First time mentioning the site. Keep it casual, helpful, not salesy.

POST 4: Back To Pure Value

Format: POV - Hands writing/typing with text overlay

What to film:

- Hands writing on paper (making a list or taking notes)
- OR typing on keyboard
- Natural, simple movements
- 20-30 seconds of footage

Hook text: "Things nobody tells you about internship applications"

Content Structure:

- Text appears over POV footage:
 - "Most applications = silence"
 - "Apply to 50+, hear from 5"
 - "Rejection isn't personal"
 - "Your first internship $\neq$ your whole career"
 - "You only need ONE yes"

Audio: Calm, honest, reassuring trending sound

Caption: "The application process is brutal, but knowing what to expect helps. Keep going. 🤝"

Hashtags: #internshipadvice #collegetips #careeradvice

How to film: Phone propped looking down at desk, film hands writing/typing naturally.

Notes: No mention of site. Just pure helpful content to keep building credibility.

POST 5: Address A Specific Pain Point

Format: POV - Walking/campus footage with text overlay

What to film:

- Walking across campus (point camera down at feet/ground)

- OR sitting at library table (camera on table showing desk/books)
- OR just hands on desk looking stressed
- 20-30 seconds

Hook text: "POV: Your college career fair experience"

Content Structure:

- Text appears over footage:
 - "'What's your GPA?' (3.2 isn't good enough)"
 - "'Do you have experience?' (isn't that WHY I'm here?)"
 - "'We'll reach out!' (they never do)"
 - Final: "There are other ways to find opportunities"

Audio: Sarcastic/relatable trending sound (search "college fail" vibes)

Caption: "Career fairs can be rough. But they're not your only option - promise. Drop a ❤️ if you've felt this."

Hashtags: #careerfair #collegelife #engineeringmajor

How to film: Just hold phone naturally while walking or prop it on desk. Add text in CapCut.

Notes: Engagement bait with "drop a ❤️" - encourages comments/likes.

POST 6: Show Another Tool On Your Site

Format: Screen recording - Resume Builder demo

What to record:

- Navigate to Resume Builder on your site
- Show how it helps translate experiences
- Demonstrate 2-3 bullet point transformations
- Keep it moving, don't linger too long
- 25-30 seconds max

Hook text: "Your resume isn't bad - you just don't know how to talk about it"

Content Structure:

- Screen record the tool in action
- Text overlays showing:
 - "Group project → collaborated with cross-functional team"

- "Part-time job → managed competing priorities"
- "Quick examples show you how"

Audio: Upbeat, productive sound (search "productivity" or "study motivation")

Caption: "Most students have more experience than they realize - they just don't know the language. This helps. (Free, link in bio)"

Hashtags: #resumetips #internshipprep #collegestudents

How to film: Screen record on computer, add text/audio in CapCut.

Notes: Show value first, then casually mention it's free and in bio.

POST 7: Create FOMO (Fear Of Missing Out)

Format: POV - Coffee shop or study spot with text overlay

What to film:

- Sitting at coffee shop/library (show table, laptop, coffee)
- OR just hands holding phone scrolling
- Casual, relatable setting
- 20-25 seconds

Hook text: "While you're stressing about not having an internship..."

Content Structure:

- Text appears:
 - "Steve Jobs didn't have one"
 - "Bill Gates didn't have one"
 - "Most successful people took weird paths"
 - "Your timeline ≠ everyone else's timeline"
 - Final: "There's more than one way"

Audio: Inspiring/motivational trending sound (calm, hopeful vibe)

Caption: "Linear paths are actually pretty rare. Non-traditional routes are valid. Your journey is yours. ❤️"

Hashtags: #careerpath #collegeadvice #morethanoneway

How to film: Prop phone to show desk/workspace, add text in CapCut.

Notes: Reinforces your site's philosophy without being promotional.

POST 8: Show The Career Pivot Tool

Format: Screen recording - Career Pivot page

What to record:

- Navigate to Career Pivot section
- Select one major (e.g., Mechanical Engineering)
- Show the different career paths listed
- Scroll through a few options
- 25-30 seconds

Hook text: "Think you picked the 'wrong' major? Watch this"

Content Structure:

- Screen record showing multiple career paths
- Text overlays:
 - "Same degree, totally different careers"
 - "You're not locked into one path"
 - "Explore what's actually possible"

Audio: Hopeful/empowering trending sound

Caption: "Your major doesn't trap you. There are more directions than you think. Check them out at MoreThanOneWay.org 

Hashtags: #engineeringmajor #careerpaths #majorregret

How to film: Screen record on computer, add text in CapCut.

Notes: This tool is unique to your site - showcase its value!

POST 9: Community Building

Format: POV - Hands writing or notebook close-up with text

What to film:

- Close-up of hands writing in notebook
- OR flipping through planner/journal
- Intimate, personal feel

- 20-25 seconds

Hook text: "Things every college student needs to hear right now"

Content Structure:

- Text appears over footage:
 - "Not having it figured out = normal"
 - "Your friends are struggling too (they just hide it)"
 - "Asking for help = strength, not weakness"
 - "One bad semester ≠ ruined life"
 - Final: "You're doing better than you think"

Audio: Gentle, supportive trending sound (search "positive affirmation" vibes)

Caption: "Sometimes you just need to hear this. You're not falling behind. ❤️ What would you add?"

Hashtags: #collegelife #mentalhealth #studentlife

How to film: Close-up phone shot of hands/notebook, add text in CapCut.

Notes: Engagement question "what would you add?" to boost comments. Still no story submission ask.

POST 10: Soft Introduction To Story Feature

Format: POV - Sitting at desk/coffee shop, reflective mood

What to film:

- Sitting at desk with laptop (camera shows workspace from your perspective)
- OR coffee shop table setup
- Calm, thoughtful atmosphere
- 20-25 seconds

Hook text: "The most powerful thing about college struggles?"

Content Structure:

- Text appears:
 - "Everyone's going through it"
 - "But nobody talks about it"
 - "So everyone feels completely alone"
 - "When really... we're all struggling together"

- Final: "What if we changed that?"

Audio: Reflective, hopeful trending sound (emotional but not sad)

Caption: "There's power in shared stories. If you want to share yours (anonymous is fine), link in bio. Just knowing you're not alone helps. ❤️"

Hashtags: #collegestruggles #shareyourstory #yourenotalone

How to film: Prop phone to show workspace, create contemplative mood with lighting.

Notes: FIRST mention of story sharing, but it's soft and optional. You've built trust first.

POSTING SCHEDULE

Week 1: Posts 1, 2, 3 (Monday, Wednesday, Friday)

Week 2: Posts 4, 5, 6 (Monday, Wednesday, Friday)

Week 3: Posts 7, 8 (Monday, Thursday)

Week 4: Posts 9, 10 (Monday, Thursday)

AFTER POST 10: ONGOING STRATEGY

1. Content Type Rotation:

- **Screen recordings** (40% of posts) - showing site tools
- **POV/hands content** (30% of posts) - relatability
- **Campus/environment footage** (20% of posts) - context
- **Mixed/experimental** (10% of posts) - try new things

2. Monitor Performance:

- Which format got the most saves/shares?
- Which drove profile visits?
- What hooks stopped the scroll?
- Which ones got the most watch time?

3. Double Down On What Works:

- If screen recordings perform best → do more tool demos
- If POV content resonates → create more relatable moments
- Let data guide your content decisions

4. Story Submission Reminders:

- Every 5-7 posts after Post 10
 - Keep it soft and optional
 - Never beg - just gently remind
-

FILMING SETUP (You Already Have Everything)

Essential:

- Your smartphone (that's it, really)
- Natural lighting (near window is best)
- Quiet space

Optional but helpful:

- Phone tripod or stack of books to prop phone
- Laptop for screen recordings
- Simple desk setup (looks more authentic anyway)

DO NOT NEED:

- Ring light (natural light is fine)
 - Fancy camera (phone is perfect)
 - Professional microphone (trending audio covers this)
 - Editing software beyond CapCut (it's free and easy)
-

TECHNICAL FILMING TIPS

Screen Recordings:

- Mac: Press Cmd + Shift + 5, select area, record
- Windows: Press Windows + G, click record
- iPhone/iPad: Settings > Control Center > Add Screen Recording
- Keep cursor movements smooth and purposeful
- Record 30-40 seconds (you'll trim to 20-25)

POV/Hands Content:

- Prop phone at 45-degree angle looking down at desk

- Film 40-60 seconds (you'll trim the best parts)
- Natural movements - don't act, just do normal things
- Lighting from window/lamp in front (not behind)

B-roll/Environment:

- Film walking: Point camera down at feet/ground
- Study spots: Show the space, not your face
- Keep camera moving slowly (not shaky, not static)

Editing in CapCut:

1. Import video
 2. Trim to 15-30 seconds (keep only best parts)
 3. Add text with animations (fade in, slide, etc.)
 4. Add trending audio (CapCut has a trending section)
 5. Add auto-captions (accessibility + retention)
 6. Export in vertical format (9:16)
-

KEY METRICS TO TRACK

Watch These:

- **Average watch time** - aim for 70%+ completion
- **Saves/shares** - shows real value, boosts algorithm massively
- **Profile visits** - are people clicking to learn more?
- **Follows** - slow and steady growth is normal

These Matter Less:

- Likes - nice but don't impact algorithm much
- Comments - good but not required for success
- Views - meaningless if watch time is low

Red Flags:

- Watch time under 40% = hook failed or video too long
- No profile visits = content not compelling enough

- High views but zero engagement = wrong audience
-

TROUBLESHOOTING

"My posts still get zero views"

- New account needs "warming up" first
- Before posting content, spend 3-5 days just engaging:
 - Watch videos in your niche (college, internships, student life)
 - Like, comment, share relevant content
 - Follow accounts in your space
 - Let the algorithm learn what you're about
- Then start posting consistently

"Engagement is really low"

- Hook not strong enough (test different first lines)
- Not using trending audio (THIS IS CRITICAL)
- Video too long (trim it down)
- Posting at wrong times (test different time slots)
- Need better hashtags (more specific, less generic)

"Getting the wrong audience"

- Hashtags too broad (#college has millions of posts)
- Use specific ones: #engineeringstudent #internshipsearch
- Engage with your target audience's content
- Use college-specific trending sounds

"My screen recordings look choppy"

- Record at higher quality if possible
 - Keep cursor movements slower and smoother
 - Trim out any lag or loading screens
 - Add smooth transitions in CapCut
-

CONTENT IDEAS FOR POSTS 11-30

More Tool Demonstrations (screen recordings):

- Interview Prep guide walkthrough
- Application Tracker demo
- How the internship filters actually work
- Showing specific major career pivots

More Relatable Content (POV):

- "POV: Applying to your 47th internship"
- "Red flags in internship postings"
- "When the 'easy' class is destroying you"
- "3am application panic"

Value-Add Content (mix of formats):

- "Resume items that aren't internships"
- "How to network when you're shy"
- "What to do if you get no interviews"
- "The truth about GPA in hiring"
- "Interview questions that always come up"

Specific Pain Points:

- "Engineering student → different career paths"
- "How to explain gaps in your resume"
- "When you have zero experience"
- "Dealing with job search rejection"

Community Building:

- Success story features (when you get submissions)
 - "Things that helped me stay motivated"
 - "Resources every student should know about"
-

THE HONEST TRUTH ABOUT GROWTH

Realistic Timeline:

- **Weeks 1-2:** Probably very few views (algorithm is learning)
- **Weeks 3-4:** Small trickle of engagement starts
- **Weeks 5-8:** If consistent, you'll see gradual growth
- **Weeks 9-12:** One post might randomly pop off
- **Month 4+:** More predictable growth if you've found what works

What Success Looks Like Early:

- 100-500 views per post = normal for new account
- 5-10 saves/shares = really good engagement
- 2-5 profile visits per post = people are interested
- 1-3 new followers per post = healthy growth

Remember:

- Accounts with 10k followers started at zero too
 - Consistency beats perfection every single time
 - One viral post can change everything (but don't count on it)
 - Your mission is genuine - that authenticity will eventually resonate
-

FINAL REMINDERS

- ✓ **Film everything vertically** (phone held upright, not sideways)
 - ✓ **Always use trending audio** (cannot stress this enough)
 - ✓ **Hook in first 1-2 seconds** (if they don't stop scrolling, nothing else matters)
 - ✓ **Keep videos 15-30 seconds** (shorter is better for retention)
 - ✓ **Post consistently** (algorithm rewards consistency over viral hits)
 - ✓ **Engage with comments** (respond to every one, builds community)
 - ✓ **Don't compare your beginning to someone else's middle**
 - ✓ **Your mission matters** - helping struggling students is genuinely valuable
 - ✓ **Stay patient** - meaningful growth takes 2-3 months of consistent posting
-

YOU'VE GOT THIS

You're building something that actually helps people. The algorithm will eventually recognize that. Just keep showing up, keep posting, keep refining based on what works.

The students who need your resource will find it. ❤️

Now go film Post 1. Prop your phone on some books, film your hands on the keyboard for 30 seconds, and get started. It doesn't have to be perfect - it just has to exist.
